Présentation Concours Smart City

	hauteur_m	circonference_cm
count	200137.000000	200137.000000
mean	13.110509	83.380479
std	1971.217387	673.190213
min	0.000000	0.000000
25%	5.000000	30.000000
50%	8.000000	70.000000
75%	12.000000	115.000000
max	881818.000000	250255.000000

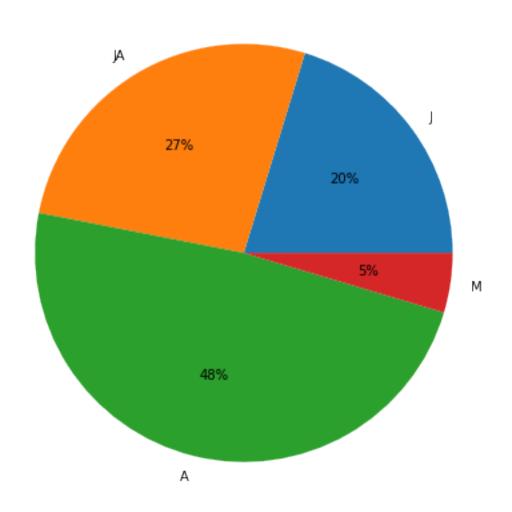

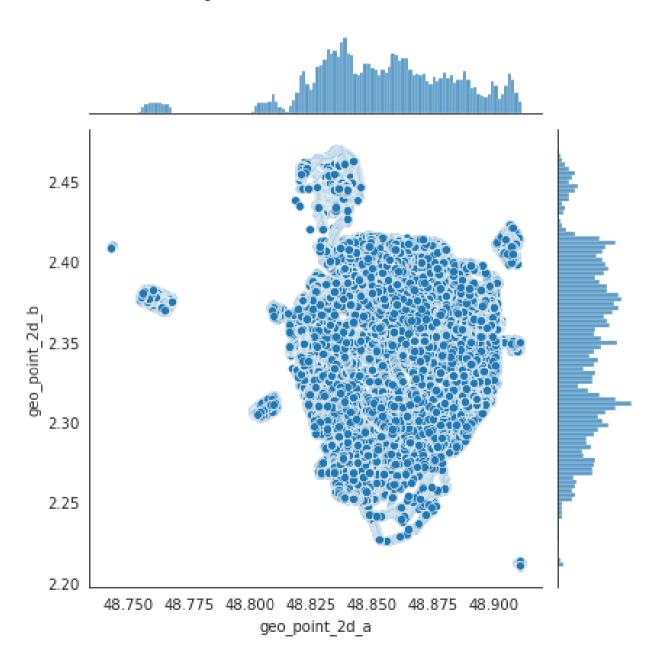

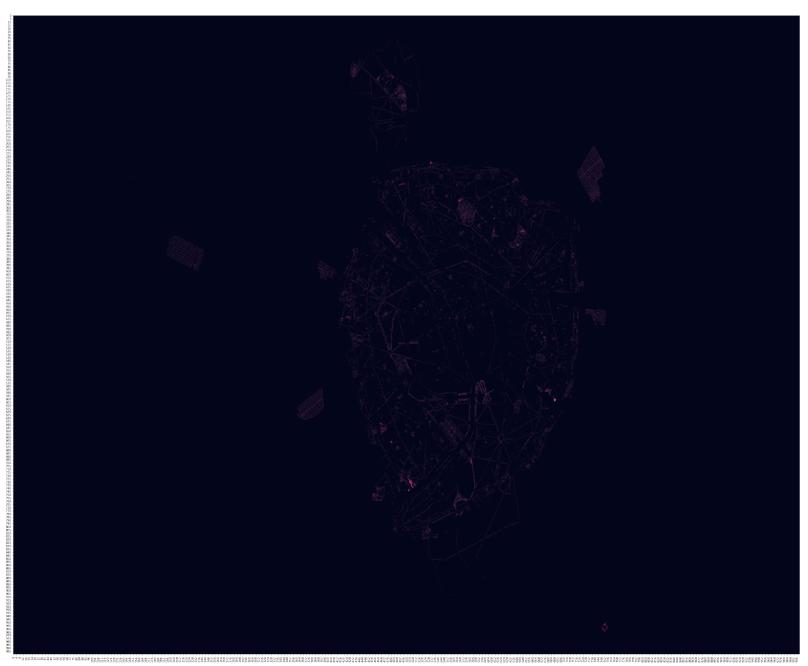

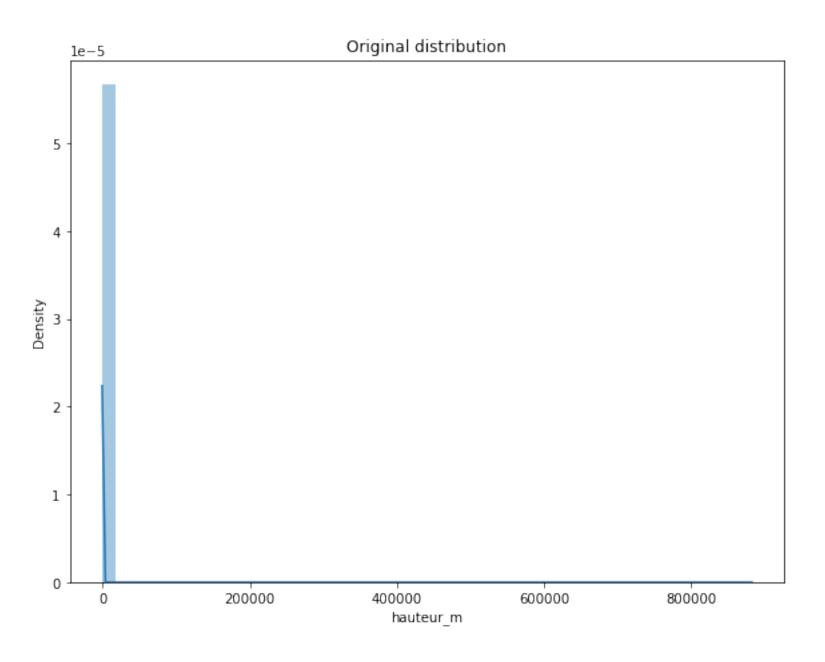

Distribution stade_developpement

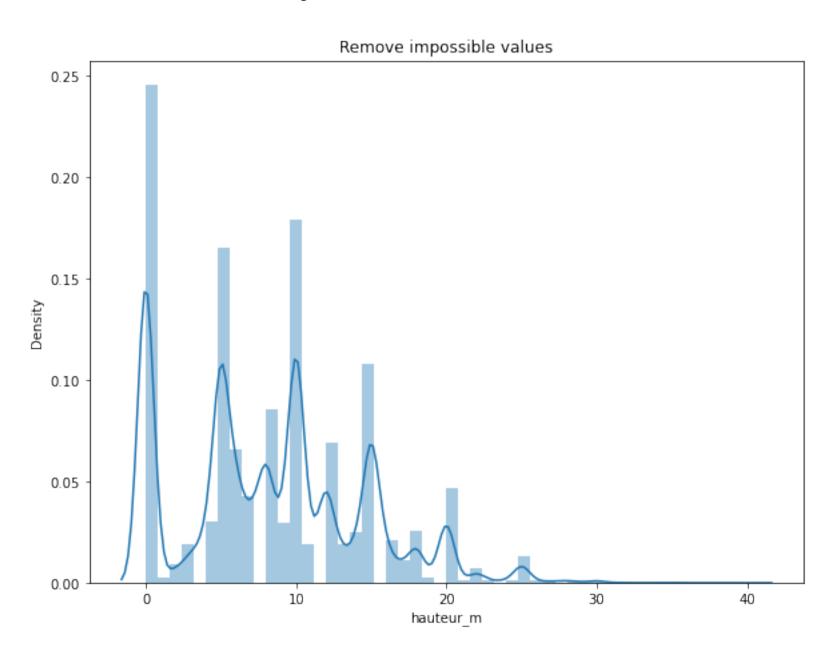

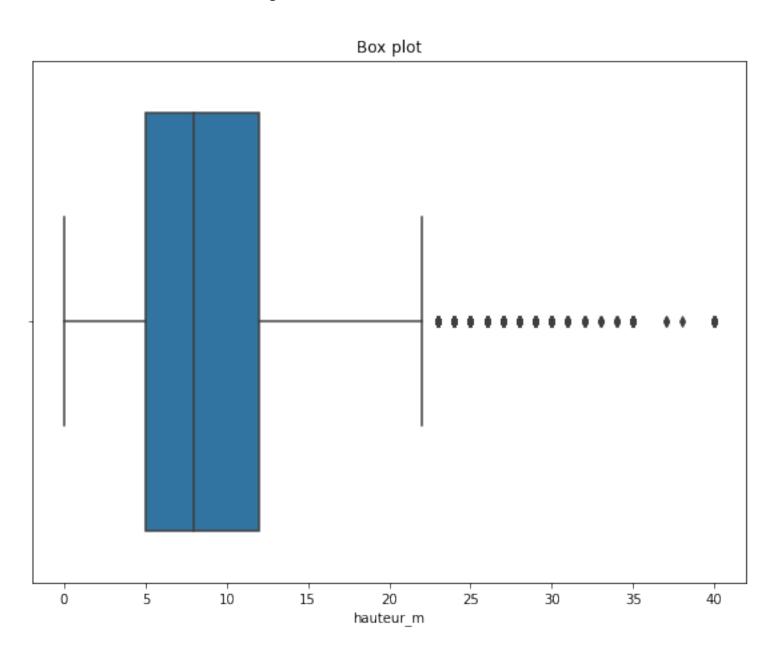

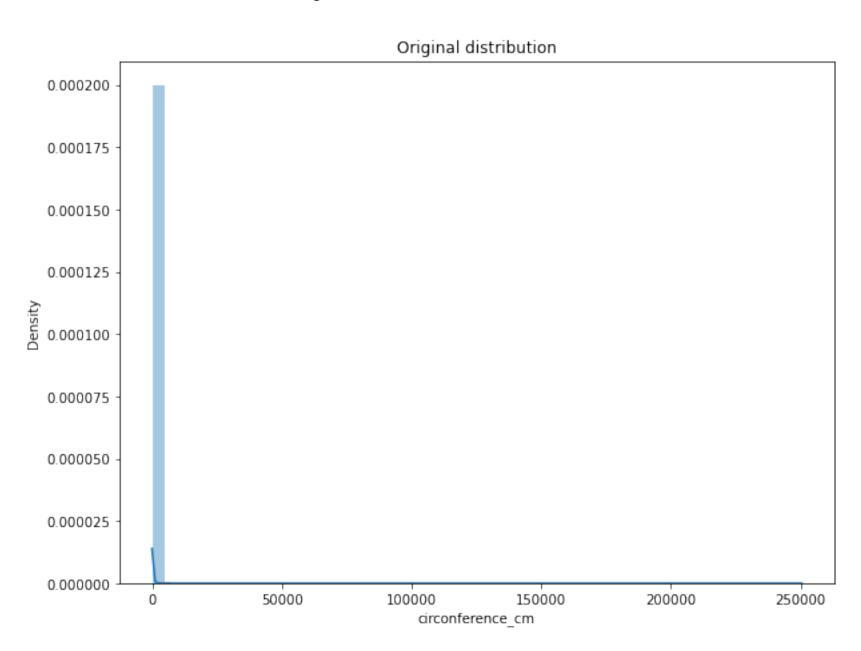

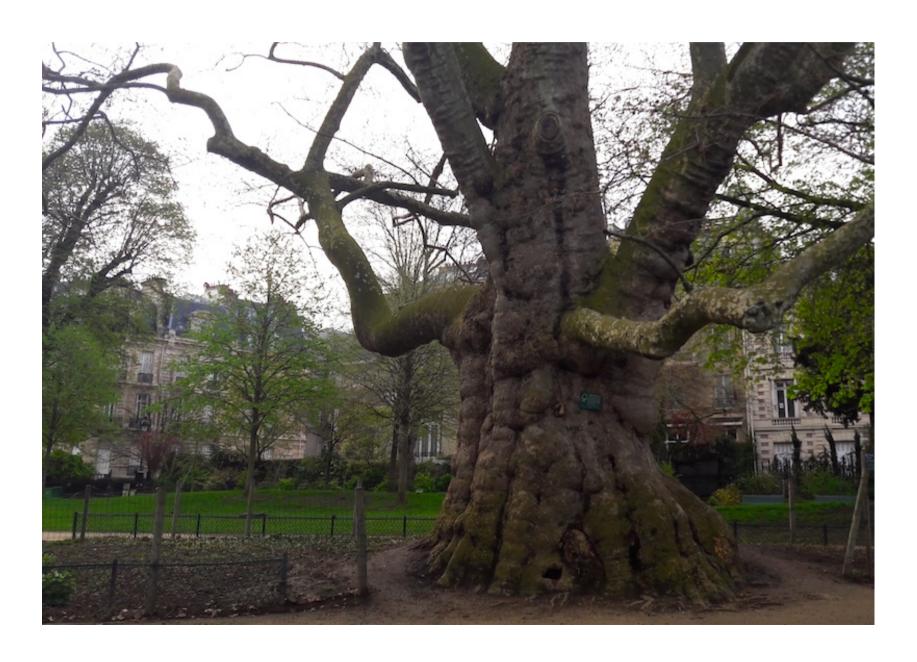

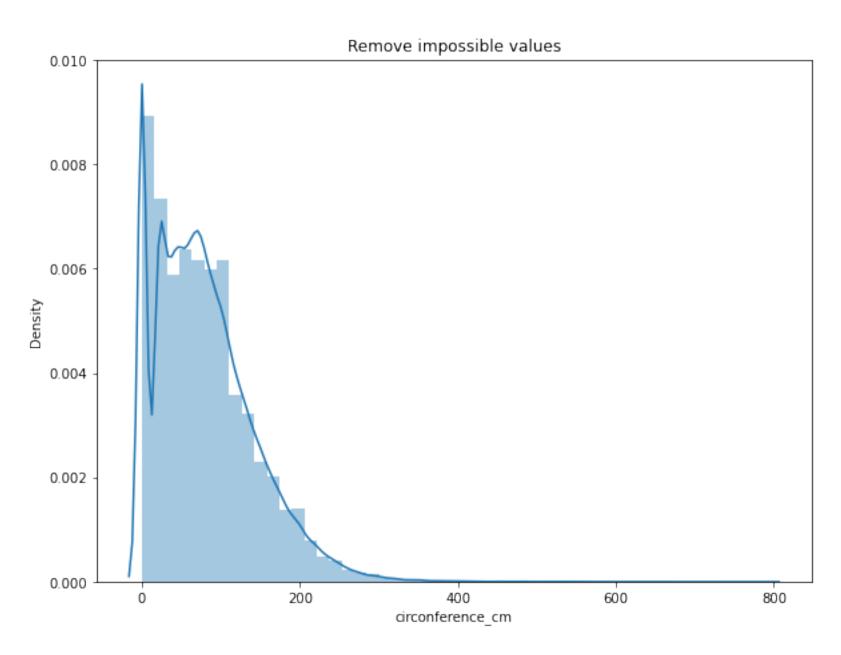

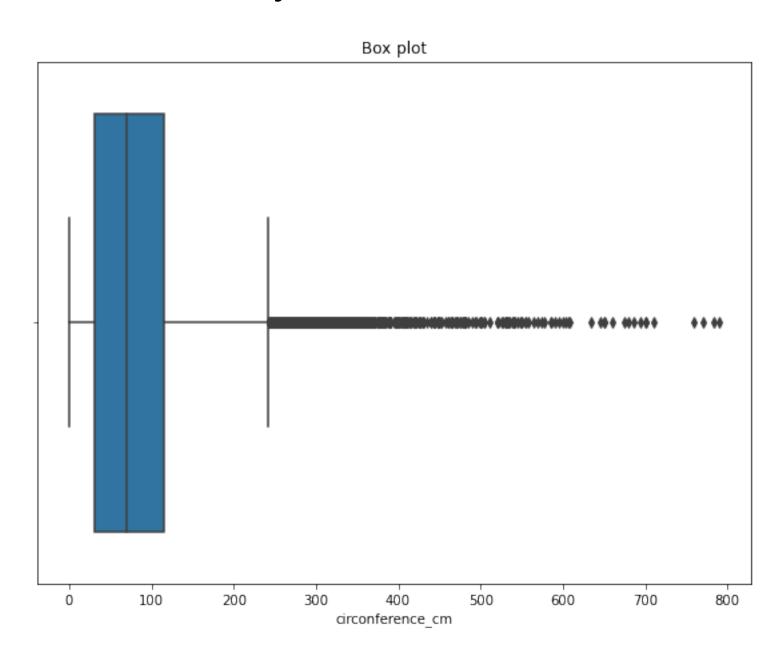

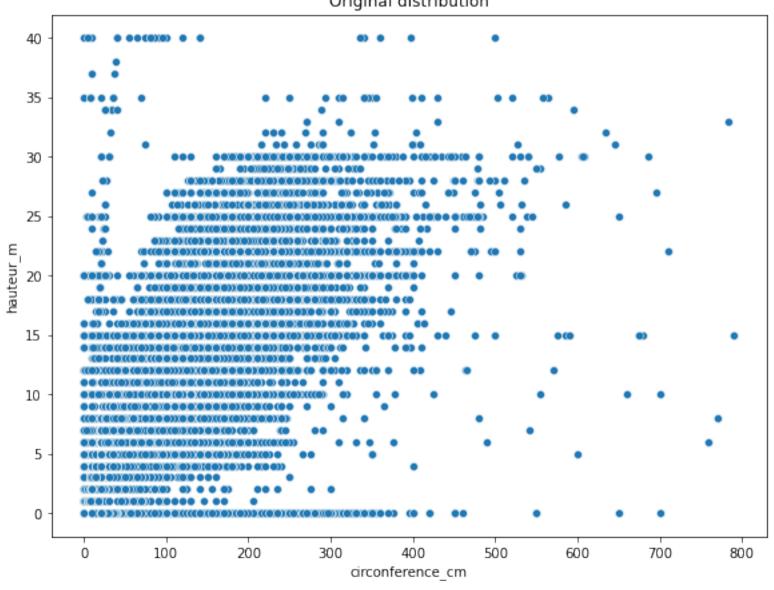

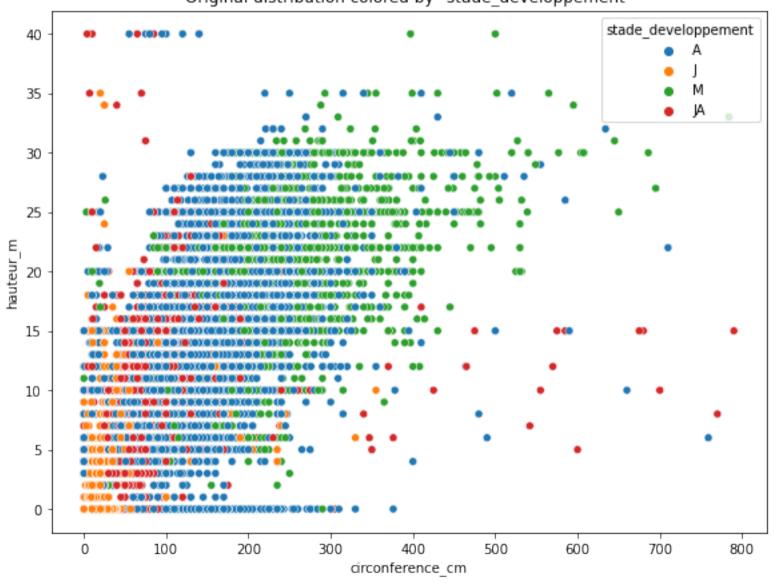

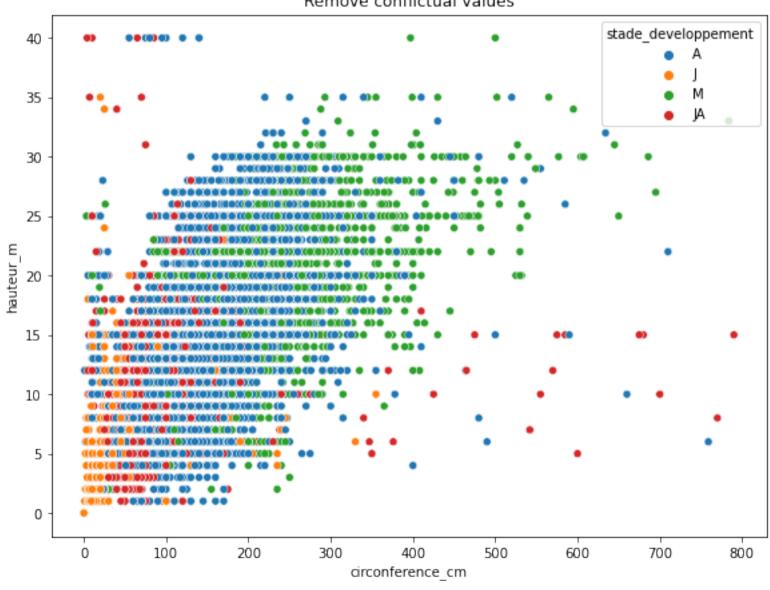

Original distribution colored by "stade_developpement"

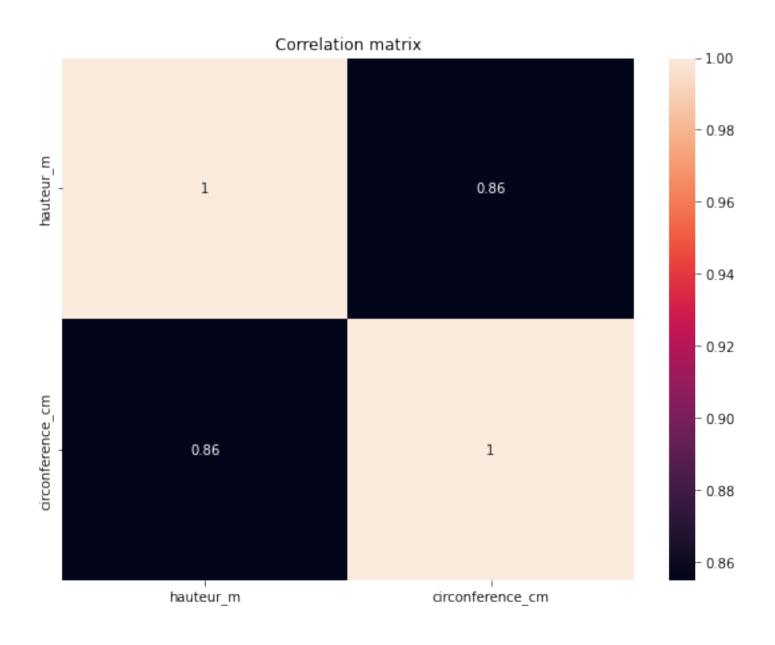

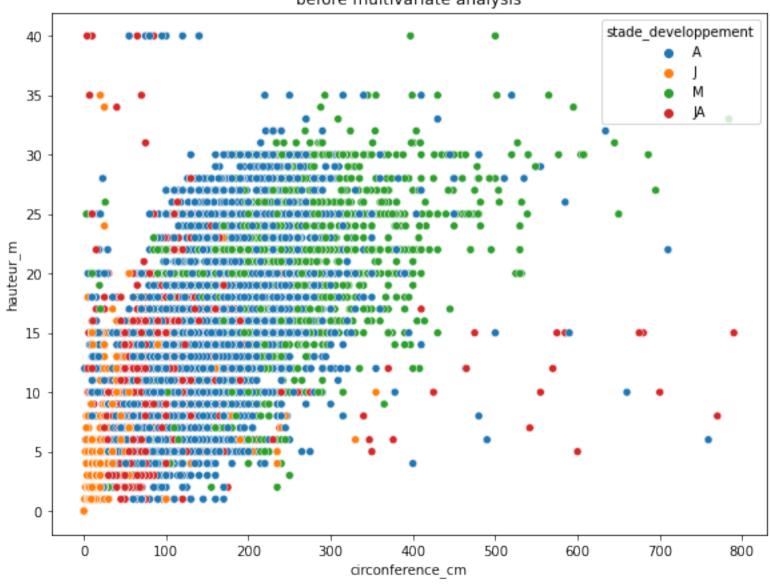

Analyse multivariée :

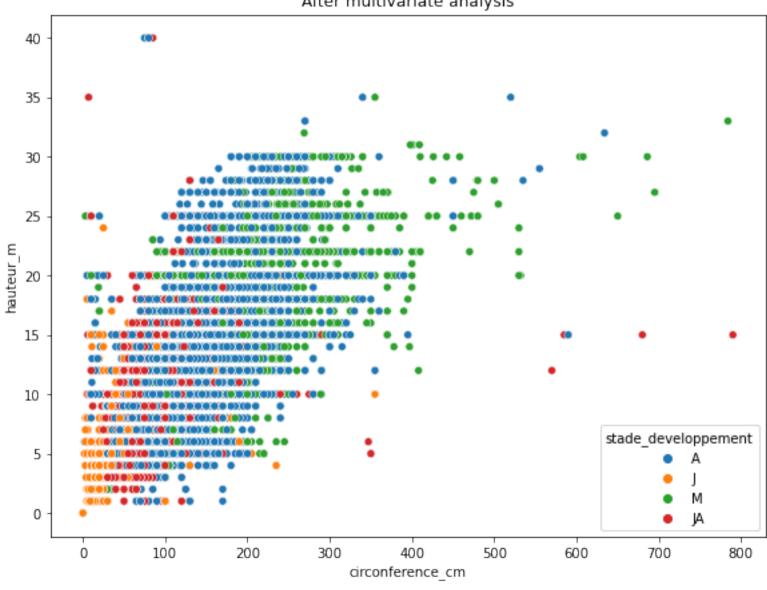

-plot matrice corrélation

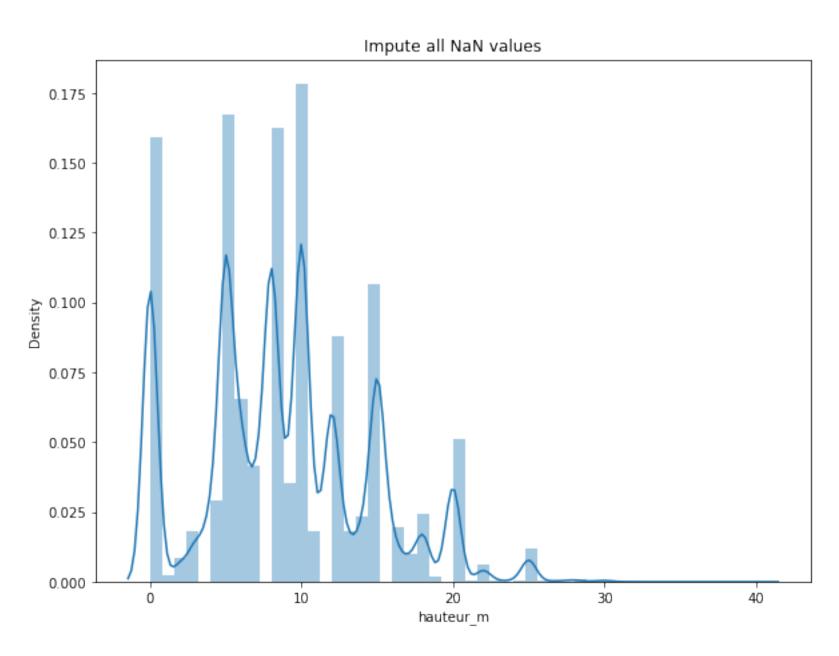

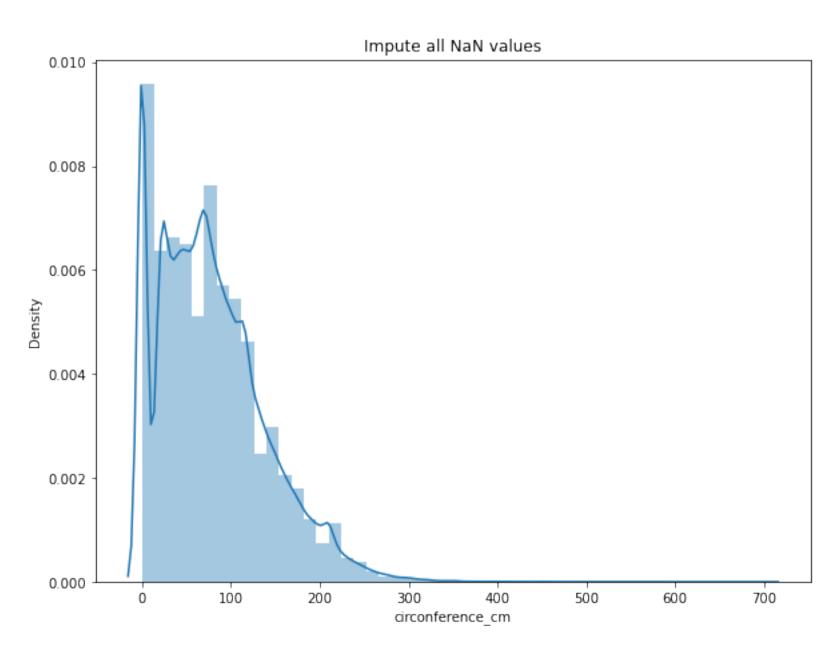

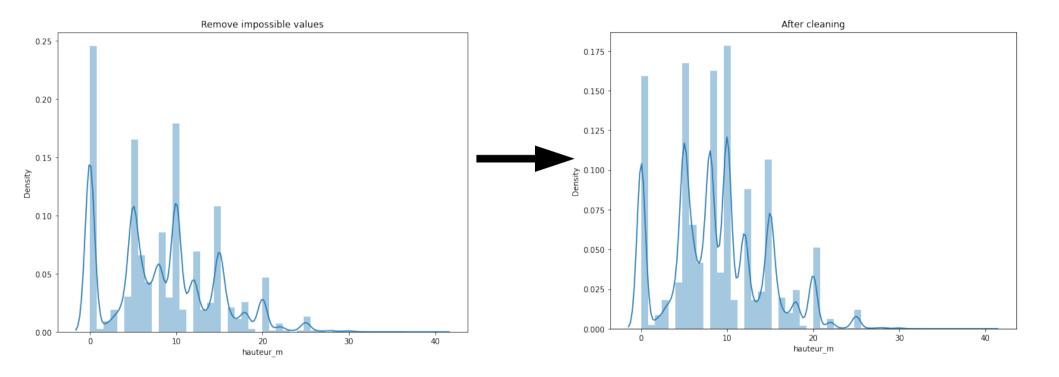

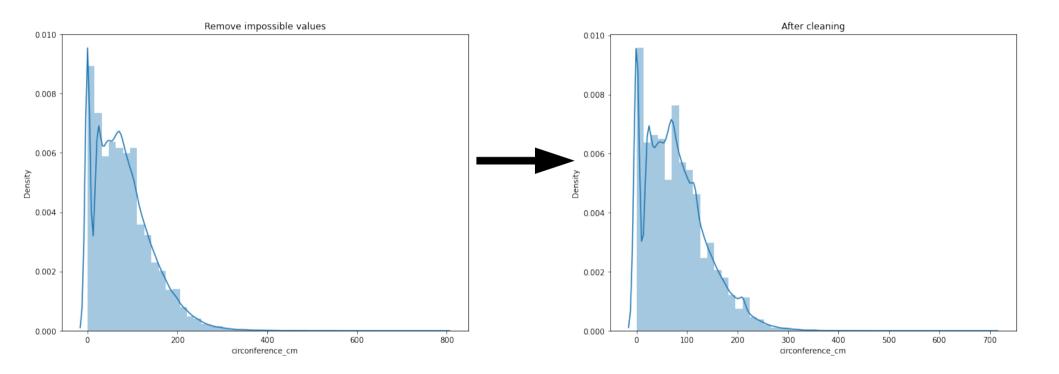

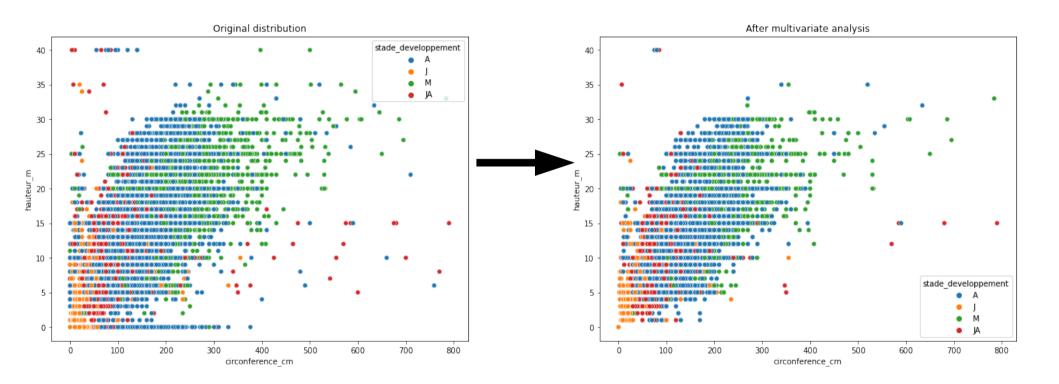

<u>Synthèse</u>

	hauteur_m	circonference_cm
count	200137.000000	200137.000000
mean	13.110509	83.380479
std	1971.217387	673.190213
min	0.000000	0.000000
25%	5.000000	30.000000
50%	8.000000	70.000000
75%	12.000000	115.000000
max	881818.000000	250255.000000

Axes d'amélioration:

- analyse multivariée
- Streetview

Autres méthodes possibles :

- nouvelle colonne "anomalies"
- régression linéaire
- KNN_imputer

Optimisation des tournées

Algo optimisation tournée sur arbres plus de 30m (explication algo floyd-warshall)
